

# AMT

## TECHNICAL DATA

AMT is possibly the best and most complete range of metal cabinets on the market.

The simplicity of a single metal case design combined with all possible door locking systems make it into an industry benchmark.

## Technical data | Common characteristics

### LEVELLING SYSTEM

JG Group S.A. uses a levelling system for its cabinets that enables them to be levelled by hand from the inside without any visible levelling mechanism on the exterior. Even if the cabinet is full, any screwdriver can be inserted in the holes of the knob. There is an indicator in the cabinet to know which way to turn the knob to either raise or lower the cabinet.

The levelling mechanism consists of two pieces of injected aluminium, a nickel-plated knob. The body of the levelling mechanism is a single piece, although it has two parts – the screw thread for the knob and the base where the cabinet rests on the floor.

### PACKAGING

Composed of two cardboard tops, one upper and one lower, and 4 reinforced cardboard perimeters to protect the sides. The latter is equipped with specially designed dies so the product can slide without damaging the cardboard. The packaging is covered in 30 or 35 micron gauge plastic.

## Technical data | **Typologies**

### AMT DOUBLE DOOR & AMT COMBINATION UNIT

AMT Cupboards are the solution for cabinets with leaf doors and shelves. The perfect complement for the conventional rolling shutter cabinet and the best possible option as a quality, competitive design cabinet. Doors available in wood veneer, melamine and steel.

### AMT SIDE FILERS & AMT COMBINATION UNIT

Basic storage solution providing easy access to the inside of the cabinet and quick display of its contents. This cabinet comes with sides that are ready for the addition of doors in the future.

### AMT SLIDING DOOR

AMT Sliding doors are usual in a certain type of installation where opening leaf doors are not desired for space reasons and sliding doors are preferred for aesthetic considerations. Doors available in melamine and steel.

### AMT BOOKCASE

Current filing cabinets fail to fit properly because they are too deep for the rest of office furniture. Our side filing cabinets fit in perfectly both from an aesthetic and a functional point of view with cabinet modules. Fronts available in wood veneer, melamine and steel.

## Accessories | **Personalization**

PV-system offers practical optional accessories such as shelves for file storage, expandable frames, and trays for CDs and cards. The removable trays and frames have a blocking mechanism for security purposes which prevents them from accidentally sliding out of the cabinet.

Side-pieces are marked at source to aid fitting shelf holders according to the arrangement chosen. The levellers are easy to use and the skirting is flush to facilitate filing drawer extraction.

Wide choices of handles compatible with the serie.

## MAINTENANCE, QUALITY AND **ECOLOGY**

Our company has the quality certification ISO 9001 and TECNALIA for years, institution that verifies and standardizes raw material and compliance with European norms applicable to office furniture.

Regarding to environmental policy, our company has implemented and certified all the measures contained in the ISO 14001 and ISO 14006, and also supplies by demand the forest certification of chain of custody for PEFC and FSC systems, ensuring that the wood used comes from sustainable forest management. Compliance with these standards facilitates obtaining LEED points with our products.

The most appropriate method to clean our furniture is to use a clean microfiber cloth, slightly moist with water, without any additional cleaning products. If some dirt is rather difficult to remove, use the same microfiber cloth or a 100% cotton one slightly moist with water and a little neutral soap or window-cleaning fluid (except natural wood). Then, dry the furniture with another soft, dry cloth. All the products that contain ammonia, caustic or solvent products are not recommended at all.

The cleaning products made specifically for furniture usually contain substances like wax to enhance the shine of natural wood surfaces that has been damaged by use and are timeworn, but such substances can give the furniture a greasy look and cause irreversible effects on it. Therefore these are also not recommended.

### RECYCLABLE

The components in our furniture are easy to separate out and recycle.

### USE

Our products are ergonomic and safe for users.

### PRODUCTION

Production processes that are environmentally friendly.

### MATERIALS

Recycled materials and secondary metals.

### TRANSPORT

We minimise the impact of transport and packaging on the environment.
